

$U_{\text{OUT}}$  circuit output voltage, V  
 $U_s$  reference stabilized voltage, V

$\overline{\Delta R}$  average error, Ohm  
 $\sigma_{\overline{\Delta R}}$  standard deviation, Ohm

### Greek symbols

$\delta_R(T)$  relative error of approximation, %  
 $\Delta r$  dimensionless normalized value of the resistance function

### Subscripts

$i$  sequence number of the approximation coefficient
